

VOLTA

Add Value & Increase Sales With a Free, Sustainable Amenity

Volta Charging is a unique electric vehicle charging company that installs and maintains charging networks for communities at high-end, premium retail locations for free.

Properties attract and retain loyal electric vehicle driver consumers and experience increased sales based on dwell time* to charge. By benefiting the community with a sustainable amenity, property reputation is enhanced.

Volta's model benefits both the community & site owners

- Free Installation
- Free Maintenance
- Environmental Goodwill
- Reimbursement of Electricity Costs, Rent

Volta proudly partners with prominent retail operators throughout the United States

The Volta Process

Volta partners with property management and ensures the process is simple and easy to scale.

01 Site Visit, Proposal, Agreement

Your Volta representative walks the property to assess premium parking locations and submits a proposal with EV station placements. Once locations are agreed upon, Volta and property sign an agreement.

02 Permitting, Site Prep, Installation

Volta secures all necessary permits and approvals and prepares the site for installation of EV stations.

03 Sponsorship & Charging

Once the stations go live, Volta will install approved, sponsor signage and shoppers will always charge for free.
